APPROVED SULP TRAINING

SULP is written to enable you to use it without training but just about everyone says that the training sessions Wendy provides help them to get the most from the resources. You may have the opportunity to work alongside others who have used the programme previously, and this can be helpful, however it's recommend that you have some form of training with Wendy herself because, as author and founder, she can update you on the latest developments in terms of practice and research and you can check your understanding on how best to implement the programme with her - or if you trained a while ago it may be time for an update! Further, sometimes Wendy trains staff who have been misinformed by feedback or 'cascading' perhaps from other members of staff who previously attended training – it can be a little like 'Chinese Whispers!' Sometimes staff share their own implementation of the programme and this may be different to how the programme was conceptualised and also different to the implementation that has been researched and proven to be effective – so it's definitely worth having some time with Wendy, even if it's just a short online/phone session. Having said that there's nothing like 'in person' training, so if your budget allows for the SULP in an afternoon or short day training, described below, this is recommended. Alternatively, the practical study days (also described below) includes SULP and there was excellent feedback on the days Wendy presented in 2017 so she will be presenting them again (with a few tweaks!) in different parts of the country - you can email to check if there's one coming up near to you. One of the tweaks is that numbers are now capped at around 15 to enable more practical activity and small group discussion. Books to try are also now included in the study day fee.

Below are the options for training – prices to suit all budgets. **You will receive an attendance certificate to show that you have received approved training with the author.** Please note that the only approved training is that provided via Wendy's website as listed below.

Online introductory or 'check your understanding' session. Price £95

This is for two people, including a manager, as Wendy will help you to see how you can eventually use the programme to benefit all the pupils in the school as well as those who have special needs. She will guide you through the nuts and bolts of the programme and cover the elements that are important for effectiveness. If your online connection is poor you can have a loudspeaker phone session instead.

SULP in an afternoon: introduction and practical demonstrations of set 1. Price from £690 plus mileage, subject to location and availability – please email enquiries@wendyrinaldi.com to check. This session is for up to 10 people at your school or health clinic and covers the Set 1 programme, including social communication and friendship. A follow up session on set 2 can be booked at a later date. **Afternoon sessions on Pragmatics (Inference and Language Organisation) or GIGIA Maths and Science are also available.**

Paired/trio training: SULP short day course. Price: £350 for two people; £490 for three.

All the SULP short day courses are held at Wendy's office near Guildford Surrey. They include demonstrations from sets 1 and 2, including social communication, friendship, self esteem and emotion.

Practical Study Days: Social Communication, Social Understanding, Learning and Wellbeing

The practical study day consists of a series of practical tutorials based upon Wendy's work as a therapist and researcher in education with children and teenagers. It is open to SENCOs, specialist teachers, educational psychologists and speech-language therapists working with children at primary and secondary school who have special needs – from those with specific needs such as ASD or specific language/learning difficulties to those with more general learning difficulties. Please note that teaching/therapy assistants and apprentices should attend with their SENCO or mentor/Speech-Language Therapist.

The tutorials include illustrations from Wendy's published work with 'books to try', together with ideas that teachers, health professionals and their assistants can use to develop their practice generally. Topics include social communication and social understanding; friendship; self esteem; emotional understanding and communication; inference; language organisation for getting your ideas and feelings across effectively. A final lecture looks at how to help children with special needs develop a better understanding of subjects such as Maths and Science. Please email enquiries@wendyrinaldi.com for a description of lectures, prices (half day, full day or two day attendance) dates and venues.
